Glowsworth Logistics & Transport Services is a division of Glowsworth Engineering Ltd, the company is providing domestic transport of good for companies and other customers.

It has a highly experienced and professional team which offers full range of logistics, transportation services and supply chain solutions to our customers.

Among others, Glowsworth Logistics & Transport Services offers a range of logistical services, Procurement, Supply Chain Management and fleet management. The company had become a reliable partner in area of road transport for customers.

The services of **Glowsworth Logistics & Transport Services** are extended of warehousing and declaration services. The company focuses mainly on the domestic, but also international transport of goods and additional logistics services. The company has a number of years of experience and expertise connected to the road transport and transshipment of goods and bulk materials (i.e. raw materials, plastics, manufactured goods, chemicals, metallurgical products, cars, equipment, oil & gas, cash crops, pharmaceuticals products, flour, sugar, foods & beverages, alcohols, foods crops, aluminum ingots, ferroalloys, coke, etc.) light and heavy chemicals and also transshipments at border transshipments to west African countries.

We have our own fleet of trucks and wide Fleet Park of our subcontracted partners at use for execution of our customers' demands. Thanks to these conditions we do not have to limit our customers by neither the weight nor volume of the transferred goods.

Another service we provide at **Glowsworth Logistics & Transport Services** is the fleet management. In this area of service we assure the effective usage of the fleet park, its optimal financing, insurance, legal and tax conditions, fleet maintenance, fleet management and all the other necessities connected to this service.

Managed Transportation Solutions

People-Centric Solutions

Gain control and visibility to your supply chain, reduce costs, improve performance, and increase efficiencies.

Creating Value

Experience continuous value through our managed transportation relationship. We take the time at each step to ensure your expectations are being met. The result you will see is continuous improvement in your supply chain.

FLEET MANAGEMENT

Recently we started to offer the service of fleet management. For this area of services it is needed to have professional knowledge of the vehicles, maintenance, its financing, insurance, legal and tax issues and others. This solution is designed as a bespoke proposal with focus on maximal comfort and hassle free running for our customers so that they can focus on their own business.

The breakdown of services concerned with fleet management:

- Implementation of different devices including GPS monitoring, alarms, audio and TV, gearbox lock etc.
- Advising on choosing the right vehicles to fit the needs of customer and registering the vehicles to the registry (number plates, registering, cancelling from registry or reregistering)
- Scheduling the service checks and MOT, administrative services including road taxes etc.
- All in one contact – one phone number for all the queries
- Pick-up service (vehicle delivery and collection at an agreed point v case of scheduled checks, MOT, emissions, etc.)
- Complete peace of mind package – all vehicle checks, repairs, tires stocking, MOT, emissions checks and others)
- Complex car insurance, decommissioning and claims (liability, accident and collision insurance)
- Car wash service according to client's needs
- Assuring the client's full mobility without barriers including replacement vehicle
- Drivers training
- Information reports for client
- Monitoring of invoices from suppliers
- Repairs and maintenance of the vehicles
- Fuel cards
- Providing sales of vehicles
- Other services

Road Transport

We are focusing on the road transport since our establishment. For these purposes we do own our own modern fleet of trucks for transport of loose, solid, liquid, gaseous materials. Moreover we do use a benefit of wide range of fleet of our subcontracted partners to assure the highest possible flexibility in transport.

Breakdown of services we offer in road transport:

- domestic and international transport of bulk materials (loose materials)
- domestic and international transport of pallet's goods
- transportation of the dangerous goods
- truck bookings
- transportation insurance services
- combined transports optimization

WAREHOUSING

Since our first customer had ordered the transport we acknowledged the importance of warehousing. Today, we do have number of rented and subcontracted warehouses in the key destinations where we offer safe and quality warehousing for our customers.

We can provide warehousing and distribution in and from these warehouses. When we are building the optimal solution for expenses and quality to meet our customers' needs, the warehousing is one of the important components for proposal and execution of transport.

Within warehousing we offer:

- own and rented consignment warehouses
- transport and distribution of goods on JIT basis
- bespoke project transport solutions

IT SYSTEMS

Our proprietary algorithms are turning masses of data into relevant information in split seconds, so that our customers can purchase transportation as efficiently as possible.

Our proprietary, customer-centric technology is developed exclusively for last kilometer logistics for heavy goods.

- Truck XPO is a web-based suite of technology tools for consumers
- Automated notifications alert consumers to appointments and deliveries
- GPS tracking provides live ETA updates and electronic PODs
- Voice integration technology allows consumers to manage their orders by using smart Speakers with Google Assistant
- Augmented reality creates a virtual image of how an item will look in a room, dramatically decreasing the likelihood of returns and damages
- Business intelligence reporting and custom analytics drive continuous improvement
- Real-time visibility of transactions, order status, and inventory
- Single integration of all supply chain solutions, including warehousing and transportation
- Dynamic functionality adaptable to robotics and automated solutions
- Predictive analytics
- User-configurable dashboards and reporting
- Distributed order management to support multi-site and multi-channel environments
